

Pan Treatment Time-Release Technology

Stop water leaks and clogged drains.

Reduce fungus, mold and mildew.

Time Released for long-lasting results.

SF Time-Release Drain Pan Treatment uses state-of-the-art, in-water-activated, time-released polymer technology. The product may be used safely in air conditioner and refrigerator drain pans, dehumidifier water tanks, or any other non-potable water retention area. With the effective use of Time-Release Drain Pan Treatments, condensate water will be sanitized; discouraging the growth of micro-organisms keeping drain pans clean and free flowing.

What is SF?

The SF product line offers quality, reliable, cost-effective products for a wide range of HVAC applications. Supported by Ingersoll Rand, we are dedicated to providing our customers with high-quality, value-priced solutions and pride ourselves on delivering dependable solutions for your project needs.

- *A solid-packaged strip releases the active ingredients, leaving only the used polymer shell to be discarded.*
- *Only activates with water.*
- *Provides dependable, sustained time release protection for only pennies a day.*
- *Adds a light, pleasant scent to the air as it is activated.*
- *Registered with the EPA killing odor-causing bacteria. (EPA Reg. No.63281-2-80464)*
- *6 Tonnages, and 3 different pack sizes available for all residential and commercial job needs.*
